Title: Valve And Method For A
Brake Control Actuator

Commissioner for Patents
Box Fee Amendment
Washington, DC 20231

AMENDMENT

This amendment is in response to the Office Action dated November 13, 2002.

IN THE CLAIMS:

Please amend the following claims:

4. (Once Amended) A valve for a brake control actuator comprising:
a rod operable between respective operating conditions to selectively allow passage of brake fluid through the valve; and
a ball affixed at one end of the rod, the ball including a sealing section that upon engagement against a ball-receiving seat in the valve blocks passage to brake fluid therethrough, the ball further including a mounting section integral with the sealing section, the mounting section configured to provide a reduced footprint relative to a spheroidal footprint and enable a strong mechanical joint between the mounting section and the rod, wherein the mounting section comprises a cylindrical section circumferentially defining a midsection of the ball.
